Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Lazaris et al.

There is disclosed in Lazaris a beverage preparation machine, comprising: a first piercing element 42 for forming an inlet, in use, in a cartridge; and a second piercing element 44 for forming an outlet in the cartridge; wherein the first and second piercing elements are formed as a single removable unit 40. The piercing elements are attached to a movable element not attached to the cartridge holder of the beverage preparation machine.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4, 7-12, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lazaris et al. in view of Fischer '519.

Fischer discloses in a beverage preparation machine, the use of a fixed lower part 2, upper rotatable part 1, and inlet and outlet piercing elements.

It would have been obvious to one skilled in the art to provide the machine of Lazaris with the fixed lower part and rotatable upper part disclosed in Fischer, in order to provide an alternative arrangement for securing a cartridge for injection of heated liquid.

In regards to claims 4 and 12, the use of plastic to construct the piercing elements is an obvious matter of design choice, since applicant has not disclosed that the use of plastic solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with that disclosed in the prior art.

In regards to claims 7, 9, 15 and 16, the size and number of piercing elements is an obvious matter of design choice, sine applicant has not disclosed that such variables solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with that disclosed in the prior art.

Allowable Subject Matter

Claims 5, 6, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 10 April 2006 have been fully considered but they are not persuasive. Applicant argues that the Lazaris reference fails to disclose piercing elements which are unattached to the beverage preparation machine. It should be noted that, as pointed out in the rejection, the piercing elements are not attached to the cartridge holder of the beverage machine. Thus, viewing the cartridge holder as the

Art Unit: 1761

actual beverage machine, the piercing elements are considered separated therefrom and unattached thereto.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
